The additional two pieces of fire apparatus will provide for spare equipment so that repairs and maintenance issues can be accomplished without disruption to the regular operation of the Fire Department. The City of Tallahassee has solicited sealed bids for the type unit that would fit the Town's needs. Chief Michael Donati
Davie Fire Department

Davie, Florida

Dear Chief Donati

Please accept my sincerest thanks for the opportunity to have worked with your committee over the last several months on both this the aerial quint project and the pumper project for your community. Attached you'll find a printed stripper just like the aerial project for the review of your office and that of purchasing for the "tag-on" to the Tallahassee contract.

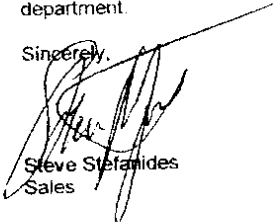

I believe this should cover all of the items the committee has brought up and is up to date as to any of the changes and options they have requested. As it stands now the total cost per unit would be \$305,575.00 each, delivered, set up and with training for all three (3) shifts.

Please let me know if there is anything at all I can do to answer questions or be of any other assistance.

It is my intent to drop off the amended written specifications for the committee tonight as I pass thru on my way north, but wanted you to have the pricing information.

Again, my sincere thanks and appreciation for the opportunity to be of service to your community and department.

Sincerely,

Steve Stefanides
